About

I have made a lot of websites and some helpful stuff in the past 10 years. Most of my work involves designing and building an efficient, lightweight, and specific-purpose app, including its operational environment (servers and CI/CD).

In the last few years, I have been working in the security field, patching vulnerable applications, improving server security, cleaning malware on servers, and so on.

Experiences

Head of IT Department

2025 – Present

University of Mataram Hospital

Responsible for maintaining the hospital's IT infrastructure and ensuring the security of patient data.

Web Engineer

2025

PT Hizrian Bersaudara Sukses

Develop an integration system for Smart Health machines

Project Manager

2024 – Present

University of Canberra

Develop web based digital games for Spatial Reasoning

Back End Developer

2019 – Present

PesanSayur.id

Responsible for providing design, integration, and implementation of the multipayment systems for several local banks and e-wallet providers. Mainly use a web-based backend for the tech stacks.

Senior Software Engineer

2019 – Present

University of Mataram

Responsible for design a problem-based information system for the organization, implementing a multichannel payment system for the students from several national banks.

Mainly use a web-based backend and web services for the executive tech stacks. Also, use git and unit tests to speed up the development process.

Project Lead

2017 – 2021

University of Canberra

Develop ELPSA.org project that implement ELPSA learning and assessment methodologies

Software Engineer

2015 – 2018

Lombok Reisen

Responsible for design and develop web applications for an online ticketing system. Help the company build an application for several kinds of attractions.

DevOps Engineer

2013 – Present

LRsoft Corp.

Responsible for configuring and maintaining the Linux server for our client's projects. Design and develop specific purpose web applications.

We mainly use CentOS's virtual private server for the operating system and AWS S3 for storage.
